## About This Game

Waking up as Bennet Helms you find yourself in a unknown place, however you do see your family which questions you deeply. You remember almost nothing but you see that something is wrong with this place, and given a choice to either just run or find your family.

Survive, look for clues and items, hide and try to uncover the mysterious truth of the Visual Corporation.

### Key features:

#### Sanity

Sanity **controls you**. It will decide many things, and you can even use it to your **advantage**. But what is it actually? The main character is **Bennet Helms** has a brain tumor on the cerebral part of the brain (The part which controls communication, feelings, sense of reality, etc.). The tumor however can be contained with **constant taking pills**.

Now, a few **effects** of the Sanity are:

- Makes the player **hallucinate** things.
- Spawns critters ("They can, and they will hurt you", the lower the sanity the more critters will come to hunt you)

- 
- Decreased vision field. (Depends on the %(percentage) of the players sanity)
  - Lowers your mental condition (Highlighting of things will be drastically decreased)
  - **45%** Critters starts start spawning
  - **25%** - Walk/Sprint slower
  - **15%** - Disabling the ability to sprint
  - **10%** - Black/White picture
  - **5%** - "**C-Condition**" - You will be very fast, you will ignore pain of the critters (This means you won't be effected if a critter pushes you, for example but you will receive damage), ability to see far objects, medication will be highlighted.
  - *\*By hurting yourself you can go down to **15% of your HP (hitpoints)**. Every **self-injury** gives the sanity bar 20% sanity.*

## WCD

To simplify WCD is the "**brain**" of the Demented world. However it depends entirely on the players **Health** and Sanity (We will get to that in a moment). Now what does WCD do? It:

- Changes the world (A wall was there buddy? Well now it isn't.)
- Changes the perception of many things
- Spawns **Critters** (Critters are the "monsters")
- Adds "corruption" to the world
- Plays trick with your mind
- System Shutdown (SS) - Changes the power in the facility.
- And other

## Radiation

**Radiation** is also a strong part of the game, as it can be **rewarding** but can be quite **opposite** as well. Also it can stop the decaying of Sanity but as the Radiation is higher it will hurt you too! Since it is a big part we cannot reveal all of the effects of the radiation.

Some **effects** of Radiation are:

- **Slows**, or stops sanity from decaying. Depends on the percentage of the radiation.  
Even with little radiation you lose bits of health. It depends on the percentage of the radiation.
- **40+ REMs** - Occasionally image blurring, and noises in head.
- **85+REMs** - Walk/Sprint a lot slower, bad reflexes, decreased hearing.

## Future Development

- 
- Make the WCD a heavy impact on the game, by changing, adding or removing whole parts of the map.
  - Add more effects to the Sanity [For instance: heavy blurring, flashbacks of past, etc.]
  - Add more effects to the Health[For instance: Add a bleed feature, when low on hp, to fall down sometimes]
  - Improve the A.I - I have a great idea for you and am developing it as we speak! It'll be a lot of fun [By fun I mean in your most immediate death]
  - Implementing Physic Engine [Ability to drag objects, boxes etc.]
  - Optimize and polish textures, models and UI
  - More intractable objects and voice overs for characters
  - A lot more to come!
