System Requirements:

As of April 2015 the game was still in beta. I will be upgrading to final status sometime after this article is posted. There have been many gameplay changes so if you're looking for a system recommendation, there's still time to adjust. Note: The default configuration is completely different from the configurations I have played on the Live servers. The changes are massive. The graphics are extremely high end. I think it's safe to say that if you have a monitor with a resolution of at least 1366 by 768, you won't be able to see the graphics go from
